 - No sites have been lost due to fire damage at this time.
 - Mobile assets staged to be deployed as needed.
 - Verizon is assessing microwave options, should they be necessary.

WEATHER OF CONCERN

Weather of Concern

- Gusty northeast winds are expected to continue through much of this week, especially over Ventura and Los Angeles Counties. Gusts up to 30 to 40 mph can be expected today, then increase to 40 to 50 mph by early tomorrow.
- The gusty offshore winds, very low relative humidity, unseasonably warm temperatures, and extremely dry fuels will allow the extreme fire danger to continue.

Active Weather Warnings, Watches and Advisories by County:

- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

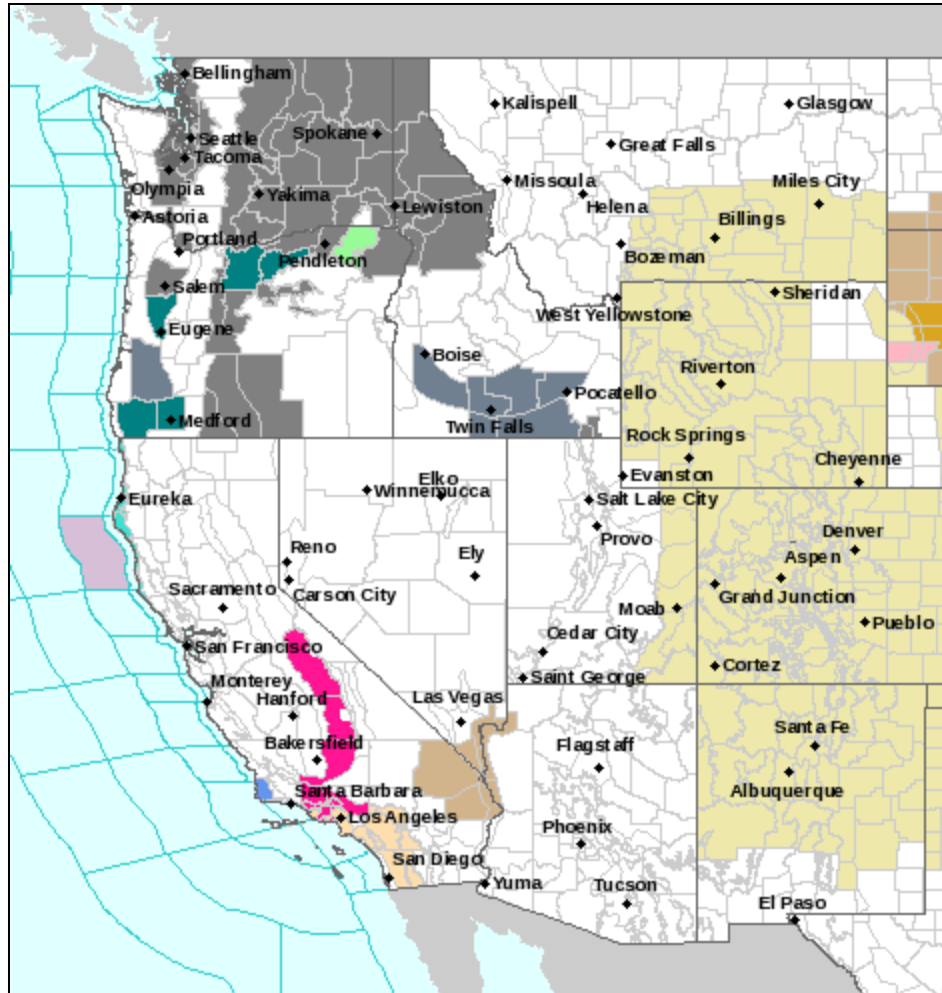

NORTHERN CALIFORNIA

The persistent ridge will remain near term although an overall pattern change is expected during the next 7 to 10 days. It appears that the ridge will weaken and allow more Pacific wave and cold frontal passages. The passages look to be dry with continued periods of unusually low humidity. The first wave passage will occur today and tomorrow. The second passage is projected for later Friday into the weekend with a third during the latter half of next week. Each system passage should progressively get stronger. This means stronger N to NE and even offshore winds, especially during the weekend and later next week. The initial cold frontal passage is expected to be weak and localize the stronger gusts to the west slopes of the Cascades and Sierra ranges. Gusts up to 30 mph will be possible then. Otherwise a weak wind flow near term. The low level inversions will be less stronger during this period although it will still exist.

SOUTHERN CALIFORNIA

Offshore flow will continue to produce northeast winds of 15-25 mph with gusts to 35 mph this morning. The winds will be strongest over Ventura and northern Los Angeles Counties. Temperatures will be up to 15 degrees above normal with highs in the 50s in the mountains to the upper 70s to lower 80s in the valleys and lower foothills through tomorrow. Minimum relative humidity (RH) will drop into the single digits in all areas except the highest mountain elevations and the San Joaquin Valley. A weak trough will pass north of the area Friday, finally bringing cooler temperatures and onshore flow. Southwesterly winds aloft will likely bring an increase in smoke from ongoing wildfires to the coastal areas. As the trough heads inland, there is a possibility of gusty north winds over Santa Barbara and northern Los Angeles County Friday night into Saturday morning. Moderate offshore winds will be possible next Sunday. No rain is expected through the period.
